

Index

[V][W][Y]

SYMBOL

+ (plus symbol)

1D (one-dimensional) tensor

500-by-500 tensor

Α

accuracy

ACTION_DROP, responding to

actions

activation function

AdamOptimizer

ADC (analog-to-digital converter)

add_summary method

amounts vector

arbitrary functions

artificial neural network

AUC (area-under-curve) value

audio, extracting features from

augment data

autoencoders, 2^{nd} , 3^{rd}

applying

batch training

neural networks

working with images

automatic differentiation capabilities

autonomous agent
